Sir:

Further to the Response filed on January 3, 2003 please amend the above-identified application as follows:

IN THE DRAWINGS:

Submitted herewith is a *Request for Drawing Change Approval*.

IN THE SPECIFICATION:

Please amend the specification as follows:

Page 1, second full paragraph

An active matrix type flat-panel display device with light emissive elements and respective driver TFTs which are two dimensionally arranged along X-axis and Y-axis in matrix is known. In such a device, the drive TFTs of the respective picture elements are sequentially scanned by column-selecting transistors (TFTs) and line-selecting transistors (TFTs). Each of the column-selecting transistors, which are sequentially turned on by means of an X-axis shift register, is connected to each column. The line-
